

More about EasyLife Kitchens

EasyLife Kitchens was incorporated in 1992 as a manufacturer of ready-to-assemble kitchen cabinets and modular built-in cupboards of quality. Our early success has prompted us to diversify into kitchen installations, and we began to appoint design consultants who could create kitchen designs that were perfect for their Clients. So successful was this approach, that within the brief span of just over a decade we became the leading kitchen suppliers in Africa.

From the moment you first step into our spacious, well-designed and inviting showrooms until you give the final approval of your new dream kitchen, we aim to ensure that your experience is a pleasant one. Enthusiasm for what we do is evident in every EasyLife Kitchens staff member you will come into contact with: from our creative and knowledgeable design consultants to our expert installers, you will notice a passion for perfection. Combined with our total project management capabilities, quality products and top-of-the-range accessories, this should reassure you that there is no better option than to entrust the most important room in your house to us.

EasyLife Kitchens' core Client is the design, quality and price conscious homeowner who builds a new home or remodels an existing one. Small and medium scale town-house developments are also undertaken, while export projects represent an increasing part of our turnover – many EasyLife Kitchens have found their way into homes and estates in over 20 African and European countries.

The company has a 3 800m² factory in Randburg (Gauteng) that uses modern and constantly upgraded technology. Due to increased demand, EasyLife Kitchens' second factory (2 600m²) was opened in Bellville South, Cape Town on 1 July 2004. This modern facility has increased EasyLife's manufacturing capacity by 50% and allows the development of a broad network of showrooms in the Western and Eastern Cape.

More about our services

Computer-aided Design

Our experienced sales consultants will analyse your needs and design your dream kitchen, or other projects such as built-in wardrobes, vanities, home studies, children's rooms, pubs, and wall dividers. Using the latest CAD technology we enable you to view your project in three dimensions from whatever angle you choose.

Measuring Service

While you can take your own measurements for smaller projects ([click here](#) to download our quick guide to measuring a kitchen), we prefer to go to your home or take our own measurements for more complex projects. This will allow our sales consultant to get a better feel for your project, study the flows and architecture features, and use these as an input into their project design.

Before one of our consultants visits your home, we would like you to come into one of our showrooms in order for our consultants to assess your specific needs and ensure that we deliver exactly what you need.

Quotations

Once you are satisfied with our design proposal we will cost your project. We have extensive price lists on our computers, which enables us to generate a quotation rapidly and tailor it to your budget if necessary by simplifying the design or changing the finishes. But rest assured that in all instances we will not compromise on quality, as we want to help you make a valuable investment.

Installation

If you feel you don't have the skills required to take on your cabinetry as a DIY project, we will appoint a team of professional installers. They work to laid down standards set and monitored by ourselves. [Click here](#) to view our installation standards.

More about our products

Warranty

All materials and components are of a first grade quality and guaranteed for two years against defects, but not misuse or water damage. blum® components (hinges, runners, Metabox drawer system) have a lifetime guarantee. Installers recommended by EasyLife Kitchens work to laid down standards – our liability is limited to their adherence to these standards.

Customer Protection

We are a full member of FASA (Franchise Association of South Africa) and abide fully by their code of ethics. We are a founding member of the KSA (Kitchen Specialists Association of RSA) who are the arbitrator in matters of dispute or litigation in the industry. [Click here](#) to find out more about Client Protection and the Kitchen Specialists Association.

Kitchen Cabinets

We manufacture and distribute a range of over 300 standard cabinets. These are machined on computerised work centers to ensure prompt and accurate assembly. You can specify the colour and finish of the exposed sides to match or contrast those of the doors. The broad range maximises space utilisation and increases the design flexibility. We use only the best available quality of boards and components to improve appearance and durability. Our drawers make use of the world-leading blum® Metabox system and all hinges are subject to a lifetime guarantee.

Doors

Doors are available in a wide selection of styles, designs, finishes and colours. There are four main categories:

- Melamine-faced doors: square line, softline or impact.
- PVC-faced doors: post formed or foil wrapped.
- Sprayed doors in plain satin or with a paint technique finish.
- Semi-solid or solid wooden doors.

The choice depends largely on the available budget and on the style of the kitchen.

Worktops

We market three quality ranges of laminated worktops – Liri, Formica Lifeseal and Surinno. We also offer a selection of over 30 granite and marble tops as well as laminated and solid wood tops.

Sinks

Stainless steel drop-in sinks as well as sophisticated stainless steel or “Stonebuilt” food preparation centres are on display in all our show-rooms, as are all types of mixers used in a kitchen.

Hardware

An extensive range of hardware suitable for installing, maintaining or upgrading your kitchen or built-in-cupboards is available at any of our stores. This includes the latest range of handles, storage accessories, worktop legs, wicker baskets, etc.

Appliances

Leading brands of freestanding or fully-integrated kitchen appliances and chimney extractors such as AEG, Bosch, Miele, Best and Whirlpool are supplied and installed by us. We are able to advise you on their features and to recommend the right appliance for the style of your kitchen.

Flooring

We supply and install the “Poliface” range of laminated flooring, an interlocking system rated AC3 on the European standard. Ideally suited for home use, it comes with a 15-year manufacturer warranty.

EasyLife Built-in-Cupboards

Our EasyLife built-in cupboard modular system is fully flexible, easy to install and available in an ever-increasing range of finishes. All storage pull out and accessories are also available to order for the ultimate in wardrobe convenience

Studies, Wall Dividers, Bar & Vanities

Our designers are able to assist you in giving your home fresh and personal touches suiting your budget and your lifestyle. Our cupboards are versatile and fit most domestic storage applications.

Upgrading and Revamping

It is our policy not to replace cabinets that can still have a useful life, but to upgrade them if necessary by using new runners, hinges or door technology. We undertake upgrading and revamping jobs with the same commitment to quality that applies to our new projects.
